

STREAMLINE H

Ez drive thruster Leading the revolution in the control of wake surf boats, announces the **New Streamline H series** for ultimate fit and performance.

March 1, 2021

MIAMI, FL. Ez Drive thruster announced today its newest hi performance product the **streamline H**.

Designed to fit even the shallowest draft boats, this sleek system provides super boat control at the touch of its illuminated military grade joystick, ez Drive illuminated switch or via your throttle control.

The Ez drive Streamline h compact unit is less than 16 inches LOA, 5 in diameter and 7" in height, yet packs power to easily turn a 5+ ton boat with gear and passengers. This means increased safety on the water for downed riders AND fuel savings of 30% providing longer time on the water between fill ups.

The Ez drive *Streamline H* is constructed with an an integrated submarine hatch lid and is pressure tested to more than one atmosphere for an IP 68 plus rating. It's fabricated from marine grade powder coated aluminum/stainless steel proven durable by a 500 hour laboratory saltwater spray. Streamline h is ignition protected for safety and equipped with watertight control cables and connections.

Ez Drive thruster "Power flow" custom nozzles direct water for optimum performance depending on each individual boat brand and design.

Streamline H - the latest in technology from ezDrive thrusters will fit every brand of boat. Ez to install with complete hardware and instructions, multiple available control systems, and "power flow" nozzles for optimum performance.

ezDriveThrusters are now on more than 15 brands of wakesurfing boats. ezDrive improves the boating experience, whether docking, surfing, or simply getting on and off lifts and trailers.

ezDrive thruster, enhancing the wake surfing experience and now available in **Streamline H series**
